These rocks were created by the powerful forces of vulcanism and erosion, which have built up and then torn down this landscape. While uniform in shape, the tent rock formations vary in height from a few feet to 90 feet. Most of the trail is on a gradual sloping incline through a slot canyon. A steep climb to the top of the mesa is available at the end of the trail for those interested. Please bring layered clothing and good walking shoes. Includes transportation, guide, bottled water and entrance fees.
